# Trade Show Internet

Why Trade Show Internet?

Trade Show Internet provides temporary Internet connectivity solutions for trade shows, meetings, and corporate events. As a trade show exhibitor or meeting planner, you can use our Internet Kit inside any convention center or hotel. The 4G Internet Kit is completely self-contained - simply connect your laptops, tablets, printers, kiosks and other mobile devices and skip the outrageous in-house Internet fees.

Kit Includes

Verizon Signal
Booster Antenna

Network
Cable

Verizon 4G
USB Modem

AT&T 4G
USB Modem

CradlePoint
Router

4G Internet Kit

Supported Devices

Tablets &
Mobile Devices

Network Printers

Laptops

Kiosks

Ways To Use Your Internet Kit

- Increase visitor engagement with your online software and website

- Accelerate your sales cycle by capturing and qualifying new leads instantly

- Generate revenue by processing orders online

- Bolster productivity by connecting network printers and other wireless devices

- Attract visitors by creating a web café

- Stay in touch with clients via email

- Save money by using your Internet Kit in your hotel room to avoid the hotel's Internet fees

How Does It Work?

Follow the included Quick Start Guide to plug in your router, modem and antenna. Easy setup in 2 minutes with no software or downloads.

Connect all of your wired and wireless (WiFi) devices.

Enter the network password provided for wireless devices to maintain your security.

Check your email and surf the web without any usage limits.

"The system was waiting at the bell desk upon arrival at the hotel, set-up was a breeze, the connection speed worked well (even when all three of us were accessing), and the return was a snap using the pre-paid label. If your company is seeking to avoid the outrageous Internet fees that are often charged at convention centers and hotels, Trade Show Internet is an option to consider."
